

Application Update – June 15, 2016

On June 14, 2016 Save Desolation Sound Society was informed that the Ministry of Forests, Lands and Natural Resource Operations (MFLNRO) made an "offer" to Lehigh Hanson Materials Ltd. on June 10, 2016 in regards to the license of occupation in Desolation Sound.

As of June 14, Lehigh Hanson Materials Ltd. had not yet signed and returned the document. Once Lehigh Hanson and the MFLNRO both sign the document, the license is considered to be "issued".

This means if both parties sign the offer, the proposed investigative activities of the gravel pit in Desolation Sound could move forward.

Save Desolation Sound will continue to follow up in regards to the status of the application and investigative activities. We will provide updates as information becomes available. Please contact us at info@savedesolationsound.com with any questions or comments.

In the meantime, we encourage you to continue to voice your opposition. Learn more on our website at www.savedesolationsound.com.
